

MSC

Description

MSC male couplings allow connecting SPIRAL round ducts or round plain ducts with inner joints. The piece is installed by pressing both ends into the ducts to be joined, up to the stop in the middle of the male coupling. Next, the male coupling needs to be fastened to both ducts with self-drilling screws or rivets. As a result of the double EPDM rubber gasket, the product meets requirements for air tightness class D according to EN 12237.

Available materials - Product code example

MSC-... - galvanized steel sheet

Product code example

Product code: MSC - aaa
